

I am a financial supporter and avid listener to K-Love Radio. K-Love provides me with high quality uplifting music that I can listen to almost anywhere in the country. I know of many people whose lives are touched every day by listening to K-Love. I feel that there would be a large portion of our local population that would be actually physically depressed without the encouragement and support that they receive from K-Love. I think that this would be the case if priority is given to LPFM Stations over the positive impact of K-Love on its translators. K-Love serves our community by providing a station where people can listen with their whole family, and not worry about references to sex or violence. It provides wholesome values that are hard to come by in a society wrought with violence and blatant disregard for human decency. I know that K-Love is an integral part of my community and I don't want a LPFM to take it's place.
